Boston University, Boston, MA — Jan 2023 – May 2027

B.S. / M.S. Data Science with minor in Environmental Analysis & Policy – 3.78/4.0 GPA

- 4th year student at Boston University CDS. Studied abroad in London. Taken Courses in Machine Learning, AI, Big Data, Algorithms, Probability and Statistics, Reinforcement Learning, as well as Economics and Product Management. Working on a Bachelor's Degree / Master's Degree. I worked in many presentation and project based classes. On Dean's list every semester at BU.

Study Abroad, Montpelier, France — Sep 2022 – Nov 2022

ILA Language Program

- Lived in Montpelier, France for six weeks in an immersion program including language classes 5 days a week.

SKILLS

- MS Office Suite: PowerBI, Excel, PowerPoint, Word,
- Programming: **Python** (Scikit, Tensorflow, Keras, Numpy, Pandas Pytorch) | **Rust** | **R** | **SQL** | **NoSQL**
- Big Data / Data Management: Azure, DataBricks,
- Data Analysis: Machine Learning / AI, Statistical Analysis, Algorithms
- Mathematics: Probability and Statistics, Calculus, Vector/Matrix Calculus, Stochastic Optimization

PROJECTS

Identifying "Stranger Danger Behaviors": https://www.linkedin.com/feed/update/urn:li:activity:7405394275842273281/

- Machine Learning project involving end-to-end development of a web application in order to automate the process of labeling video data. Worked with a PhD candidate at BU to create an application usable for research application, while maintaining privacy and security requirements. Project involved ~10,000 lines of code in Python and HTML

Offline RL for Quant Trading: https://github.com/SachielC/Finance_Agent_RL/blob/Clean/Report.pdf

- Reinforcement learning project focused on stock portfolio management. Project used new methodologies in conjunction with stock portfolio management and found a strategy which outperformed a buy-and-hold strategy for stocks over a period of time. Project involved ~2000 lines of code.

Khmer Statues Identification and Return: https://www.bu.edu/articles/2025/using-ai-to-identify-plundered-antiquities/

- Project focused on artificial data generation for computer vision. Worked with a Marshall scholar at BU to use neural networks to identify stolen artifacts. The paper, still in working stages was published in The Brink. The tech side of the project which I started has been continued at BU.

PROFESSIONAL EXPERIENCE

Course Assistant – Boston University — Sep 2025 – Dec 2025

- Course Assistant for Machine Learning course at BU (DS340)
- Position includes holding office hours, grading, and creating study guides.

AI Product Designer and Researcher – Frontier Foundry — Jun 2025 – Aug 2025

- Worked under NDA as a Consultant, Researcher and Product Designer for new AI technology in conjunction with large private banks.
- Completed product specification in under three months as well as designed machine learning approaches in a technology which has over 5 million dollars in investment raised at present.

OTHER ACTIVITIES

Secretary – Boston University Lambda Chi Alpha — Jan 2024 – May 2025

- Secretary and Executive Board member of BU LXA AZ. Created schedules and assigned disciplinary action.

Music – Boston University — Sep 2024 – May 2025

- Played in band at BU. Helped host and perform in charity shows raising over $1,000 for hunger funds.

Rowing – SRA, Captain and Team Member — Sep 2016 – May 2022

- Captained team from 2021 – 2022.
- Competed at nationals multiple times including taking fifth place in the 4x category.

Wrestling – Saratoga Springs High School, Captain and Team Member — Sep 2016 – May 2022

- Captained team from 2021 - 2022, wrestled for high school from 7th to 12th grade
- Placed top 15 in New York State at 160-pound weight class

Languages: English – Native / French – Proficient
